Election/Restrictions

Telephone call on 5/24/05 with Applicant's attorney, Rick Anderson, did not result in an election of claims because Applicant's attorney stated it would be best to have a written restriction since the client is in Japan.

Restriction to one of the following inventions is required under 35 USC 121:

- I. Claims 1-17 are drawn to a print ordering system, classified in class 358, subclass 1.15.
- II. Claims 18 and 19 are drawn to a printing device, classified in class 358, subclass 1.16.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II, which is related to a printing device and deals with the storage of print information, has separate utility such as being able to obtain information from another source, which may not necessarily be the print ordering system as being claimed in claim 1. Likewise, the print ordering system of invention I would need a printer to print out the ordered images, but such a printer does not necessarily be one as being claimed in claims 18 and 19. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
